

## Quick Guide: Using EFIT without Microsoft Internet Explorer

EFIT can be used from 12. April with any browser. The browser is only used to download a jnlp file and to show PDF files.

**Important note:** Use Java version 1.8.x. This program is free for using EFIT.

You can find the current version of the Java Runtime program on the login page for your country.

***Messages***

Recommended Java Plug-In version for EFIT [1.8.0.321](#). 

Important Message for Chrome and Firefox users:  
[Chrome and Firefox cannot not be used for EFIT](#)

[Kennwort Ändern/Vergessen](#)

If an EFIT link is used from a other browser than Microsoft Internet Explorer, a file **frmservlet.jnlp** will be downloaded, which must be executed to start EFIT. With Internet Explorer 11, the Java plugin is still used.

**Please only use this link to start EFIT:**

**CH:** <https://portal.emilfrey.ch/forms/java/efit.htm>

**SK:** <https://portal.emilfrey.sk/forms/java/efit.htm>

**CZ:** <https://portal.emilfrey.cz/forms/java/efit.htm>

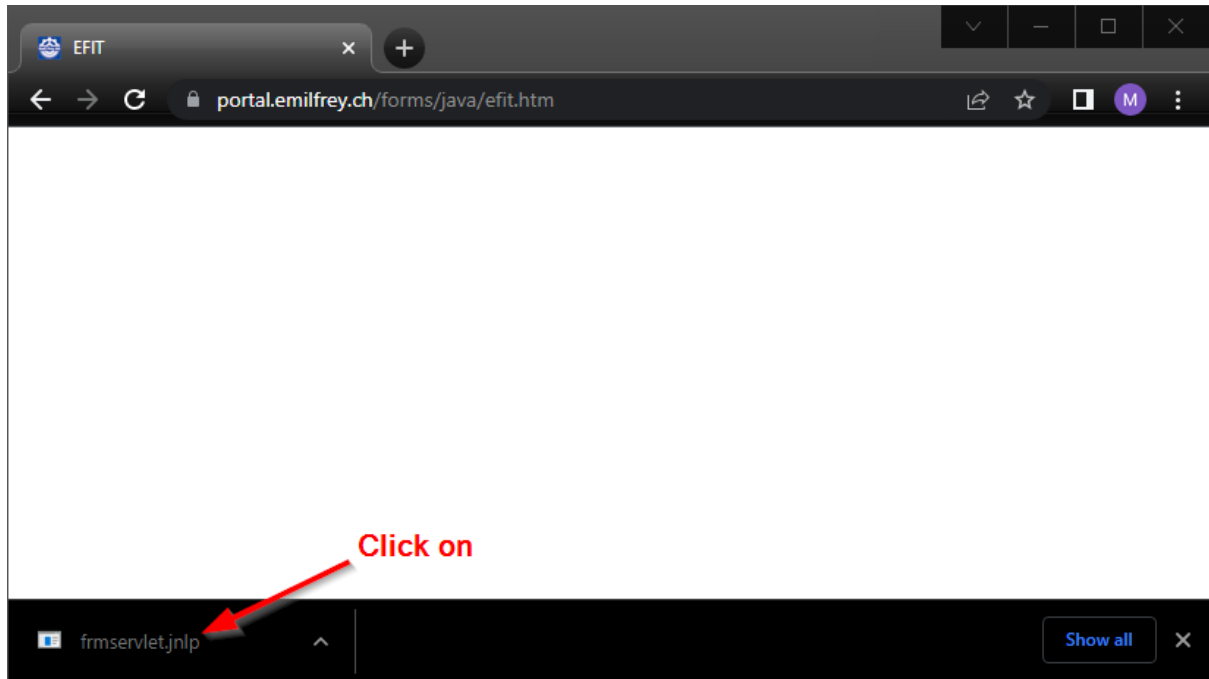

**SI:** <https://portal.emilfrey.si/forms/java/efit.htm>

**HR:** <https://portal.emilfrey.hr/forms/java/efit.htm>

**HU:** <https://portal.emilfrey.hu/forms/java/efit.htm>

For example Google Chrome Browser:

### Step 1

### Step 2 (Depending on local settings)

### Step 3
